## Course Outline

Participants will create a 15 second SD widescreen video with audio. It will be one integrated motion graphics project composed of footage, animations, photos, graphic elements, artwork and text, sound effects and music. Then they will export the sequence for output to DVD, TV and Web.

Participants will get a basic understanding of the following key areas of video-editing, special effects and compositing. The course target audience will be both primary and secondary teachers who are interested in producing presentations, DVDs, music clips, scientific and medical visualisations, and videos, and how After Effects is used in an industry context.

*Participants will get a basic understanding of the following key areas of video-editing, special effects and compositing*

## Gerry Haggerty

With over 20 years experience Gerry is a respected professional in the field of computer graphics. He introduced the Adobe products to Australia and has worked as an advanced expert for Adobe Systems both here and overseas. He has also worked for the Australian Defence Forces, Australian Federal Government, NSW State Government, Microsoft, IBM, Australian Stock Exchange, Apple, WACOM, Sydney Water and many others. He is presently working in medical, scientific and architectural visualisation and has recently completed a presentation on global warming to USA President Barrack Obama.
